### **EXAMINER'S AMENDMENT**

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with H.J. Staas on March 30, 2008.

The application has been amended as follows: replace claim 10 with the following:

10. A recording medium encoded with a computer-executable program for realizing a voice interactive method, the program causing the computer to execute:
  - performing acoustic signal processing with respect to an input voice signal and producing a processed, output signal;
  - recognizing contents of a voice contained in the processed, output signal after the input voice has been subjected to the acoustic signal processing;
  - transmitting information to a user through a voice output or a combination of the voice output and another information transmission unit based on the contents of the voice; and
  - determining whether a barge-in function of suspending transmission of information by an input or an output in the acoustic signal processing or an input signal

from an external input the transmitting information to a user is set to be effective or non-effective, wherein, in the, determining:

one or more feature values are detected from the input voice signal or the processed, output signal or the input signal from the external input, and whether or not the barge-in function is set to be effective is determined based on the one or more feature values, and the one or more feature values include positional information of the user detected from the input signal from the external input, and

an environment evaluation value of a position of the user is calculated based on the positional information and environmental information on the position, and the barge-in function is determined to be non-effective in the case where the environment evaluation value exceeds a predetermined threshold value by comparing the position of the user with previously recorded map information that represents noise levels in a plurality of areas.

***Allowable Subject Matter***

Claims 1, 2, 3, 5, 9 and 10 are allowed.

The following is an examiner's statement of reasons for allowance: The whole structure expressed by the combination of all limitations is not made obvious compared to the prior art of record for the whole invention, particularly calculating an environment evaluation value of a position of the user by comparing the position of the user with previously recorded map information that represents noise levels in many areas, where

Art Unit: 2626

a barge-in function is set to be non-effective in a case where the environment evaluation value exceeds a predetermined threshold value. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
